Humanities Science Scimat

An Interdisciplinary
Cross-Cultural
Introduction

Lui Lam

Science Matters Series

Lui Lam
Founder and Editor

Scimat (Science Matters) is the new multidiscipline that treats all human-dependent matters as part of science, wherein, humans (the material system of *Homo sapiens*) are studied scientifically from the perspective of complex systems. That “everything in Nature is part of science” was well recognized by Aristotle and da Vinci and many others. Yet, it is only recently, with the advent of modern science and experiences gathered in the study of evolutionary and cognitive sciences, neuroscience, statistical physics, complex systems and other disciplines, that we know how the human-related disciplines can be studied scientifically. **Science Matters Series** covers new developments in all the topics in the humanities and social science from the scimat perspective, with emphasis on the humanities.

Published

1. *Science Matters: Humanities as Complex Systems*
M. Burguete & L. Lam, editors
2. *Arts: A Science Matter*
M. Burguete & L. Lam, editors
3. *All About Science: Philosophy, History, Sociology & Communication*
M. Burguete & L. Lam, editors
4. *Humanities, Science, Scimat: An Interdisciplinary and Cross-Cultural Introduction*
L. Lam

Contents Summary

Prolog	1
1 Introduction	2
<hr/>	
PART I BASIC	
2 Humans	8
3 Knowledge, Nature, Science and Scimat	14
4 Science and Scimat, Again	34
5 History	63
6 Arts	85
7 Philosophy	104
<hr/>	
PART II EXTRA	
8 The Two-Culture Problem	111
9 Philosophy and Sociology of Science	132
10 History of Science	142
11 Science Communication	169
<hr/>	
PART III EXTRAORDINARY	
12 Why the World Is So Complex	187
13 Does God Exist?	198
14 Su Dong-Po's Bamboo and Paul Cézanne's Apple	211
<hr/>	
PART IV BONUS	
15 How to Do (Good) Research	229
16 On Intuition and Innovation	238
Epilog	247
Bibliography	248
<hr/>	
About the Author	250
Index	251

Contents

Preface	v
Prolog	1
1 Introduction	2
1.1 Learning	2
1.2 Teaching	3
1.2.1 Closed Teaching	3
1.2.2 Open Teaching	4
1.3 The Book	5
1.4 Summary	6
1.5 Further Reading	6
<hr/>	
Part I Basic	
2 Humans	8
2.1 We Came a Long Way	8
2.2 Humans	10
2.3 Summary	13
2.4 Further Reading	13
3 Knowledge, Nature, Science and Scimat	14
3.1 Introduction	14
3.2 Human Knowledge and the Knowscape	15
3.3 Scimat 1: The Humanities	17
3.4 Religion and Philosophy	19
3.5 Nature and Science	22
3.5.1 The Idea of Nature	22
3.5.2 The Idea of Science	23
3.6 Scimat 2: Science, Scientist and the Science Room	27
3.6.1 Science Defined	28
3.6.2 Scientist Defined	29
3.6.3 The Science Room	30
3.7 Discussion	31
3.8 Summary	32
3.9 Further Reading	32

4	Science and Scimat, Again	34
4.1	Science in a Nutshell	34
4.2	How Science Is Done	36
	4.2.1 Simple Systems	36
	4.2.2 Complex Systems	40
4.3	The Essence of Science	47
4.4	Scimat 3: Q & A, Ramification and Significance	49
	4.4.1 Q & A	49
	4.4.2 Ramifications	52
	4.4.3 Significance	54
4.5	Discussion	55
4.6	Summary	57
4.7	Further Reading	58
5	History	63
5.1	Introduction	63
5.2	Nature of the Historical System	65
5.3	Deterministic and Stochastic Systems	66
5.4	Three Different Levels in Scientific Research	68
5.5	History Studies: Conventional Methods	69
5.6	History Studies: New Methods	70
	5.6.1 Statistical Analysis	71
	5.6.2 Computer Modeling	73
	5.6.3 Computer Simulation	76
	5.6.4 Zipf Plot	77
5.7	History in the Future	80
5.8	Discussion	83
5.9	Summary	84
5.10	Further Reading	84
6	Arts	85
6.1	Introduction	85
6.2	Origin of Arts	86
6.3	Nature of Arts	88
	6.3.1 Applied Arts	88
	6.3.2 Pure Arts	89
6.4	Arts as a Science Matter	93
	6.4.1 Three Lessons from Physics	93
	6.4.2 Arts Studies in Three Approaches	95
6.5	Arts and “Science”	97
6.6	Discussion	99
6.7	Summary	103

6.8	Further Reading	103
7	Philosophy	104
7.1	Introduction	104
7.2	Philosophy	105
7.3	Neurophilosophy	106
7.4	Experimental Philosophy	107
7.5	Zeno's Paradox	107
7.6	Remarks	108
7.7	Summary	109
7.8	Further Reading	109

PART II EXTRA

8	The Two-Culture Problem	111
8.1	Introduction	111
8.2	The Origin and Nature of the Two Cultures	113
8.3	The Proper Way to Bridge the Gap	117
8.4	Demarcation According to Human and Nonhuman Systems	119
8.5	Simple and Complex Systems	124
8.6	Scimat: Motivation, Concept and an Example	128
8.7	Implications of Science Matters	131
8.8	Discussion	138
8.9	Summary	141
8.10	Further Reading	141
9	Philosophy and Sociology of Science	142
9.1	Introduction	142
9.2	Philosophy of Science	142
9.3	Sociology of Science	151
9.4	What Happened and What to Do	158
9.5	Summary	174
9.6	Further Reading	168
	References	168
10	History of Science	169
10.1	History of Science	169
10.2	Scope of History of Science	170
10.3	How Much Detail?	170
10.4	Beyond Narrative	172
10.5	An Open Problem	172
10.6	Summary	173

10.7	Further Reading	173
11	Science Communication	174
11.1	Science Communication	174
11.2	Two Brief Histories: United Kingdom and China	176
11.3	Two Modes of Operation: United States and China	177
11.4	Why Communicating Science Is Difficult: A Few Examples	178
11.5	The Problem with Science Museums	182
11.6	The Importance of Popular-Science Books	183
11.7	Discussion	185
11.8	Summary	185
11.9	Further Reading	185

PART III EXTRAORDINARY

12	Why the World Is So Complex	187
12.1	Introduction	187
12.2	What Is Complexity	189
12.3	The World Is Nonlinear	189
12.4	The World Is in Nonequilibrium	192
12.5	The World Is Nonsymmetrical	192
12.6	Mistakes Are Made	194
12.7	The World Is Full of Emergent Properties	195
12.8	Simplicity Out of Complexity	195
12.9	Discussion	196
12.10	Summary	197
12.11	Further Reading	197
13	Does God Exist?	198
13.1	Introduction	198
13.2	Why Religion? Why Science?	199
13.3	Are Science and Religion in Conflict with Each Other?	200
13.4	Do Scientists Know Better?	202
13.5	What Do Scientists Say and How Do They Cope?	203
13.6	Can One Really Know?	206
13.7	Does God Exist?	209
13.8	Afterthought	209
13.9	Summary	210
13.40	Further Reading	210
14	Su Dong-Po's Bamboo and Paul Cézanne's Apple	211
14.1	Introduction	211

Copyrighted Material: Lui Lam, *Humanities, Science, Scimat* (v0.4, 2016)

14.2	Su Dong-Po and His Bamboo	212
14.3	Paul Cézanne and His Apple	218
14.4	Neurological Basis of Their Artworks	222
14.5	Discussion	223
14.6	Summary	224
14.6	Further Reading	224
	Appendix 14.1: Dong-Po Pork	224

PART IV BONUS

15	How to Do (Good) Research	229
15.1	Introduction	229
15.2	My Background	230
15.3	What Is Physics?	231
15.4	Picking a Project	232
15.5	Executing the Project	234
15.6	Creativity and Innovation	235
15.7	The Joy of Making Physics	236
15.8	Discussion	236
15.9	Summary	237
15.10	Further Reading	237
16	On Intuition and Innovation	238
16.1	An Interview	238
16.2	Summary	246
16.3	Further Reading	246
	Appendix A: An Open-Teaching Report	248
	Appendix B: A Mixed-Teaching Report	260
	Appendix C: The Scimat Program	265
	Epilog	280
	Bibliography	282
	About the Author	285
	Index	287
